

Advance Scrubber Parts

Think about how tiresome it would really be to tidy up your own house right after throwing a large party, without assistance from cleaning machines. Back in the day, when carpets and upholstery had the dust beat out of them manually; brooms, cleaning cloths and brushes were the state-of-the-art cleaning materials of that time.

The man who founded Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who really liked to work on electrical motors. After founding his business in the year 1906, he began to make motors to drive machine tools, drills, coffee grinders and fans. Mr. Fisker's vision from the start was to have a worldwide business advertising products internationally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning industry. Mr. Fisker invented a incredible, ground breaking vacuum cleaner which could be operated by a single individual as it only weighed 17.5 kilos! This invention came in a time where other cleaning machines were massive and required at least 4 operators, therefore, the Nilfisk C1 changed everything and evolved the way we clean forever. The brain behind these very first cleaning equipment remains unparalleled. Cleaning equipment offer a brilliant solution to an ongoing crisis; things get filthy and must be cleaned frequently, without a lot of effort.

Gradually but progressively, Nilfisk-Advance developed throughout the decades. In the 1980s, this expansion actually occurred when the company became a part of the NKT Group. Their new owners' ambition and concentration made Nilfisk-Advance take a huge leap forward within the business, trying to be among the leading global players in the market of professional cleaning equipment. Nilfisk-Advance is currently represented in all parts of the globe due to steadily acquiring many smaller companies to be able to grow their product range and presence in new markets. They are proud to provide a variety of cleaning solutions to meet each requirement.
